- 1) Claims 1 to 15 are pending in the instant application.
- 2) Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1 to 4 and 11 to 13, drawn to a G protein-coupled receptor, a kit containing that receptor and a method of use, classified in class 436, subclass 501 and class 530, subclass 350.
- II. Claims 5 to 10, drawn to a nucleic acid encoding a G protein-coupled receptor, a vector and host cell containing that nucleic acid, and a method of use, classified in class 435, subclass 69.1 and class 536, subclass 23.5.
- III. Claim 14, drawn to a compound of undefined constitution, classified in class undeterminable, subclass undeterminable.
- IV. Claim 15, drawn to an antibody, classified in class 530, subclass 388.22.

The inventions are distinct, each from the other because:

The receptor protein that is invention I, the nucleic acid that is invention II, the compound that is invention III and the antibody that is invention IV are four different chemical compounds each of which can be made and used without the other and, if found patentable, would support a separate patent. Distinctness is further shown by the fact that these different chemical compounds lack a common utility which is based upon a common special technical feature which is disclosed as being responsible for that common utility. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects. (MPEP § 806.04, MPEP § 808.01).

Art Unit: 1646

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

Applicant is advised that a number of the pending claims are improperly dependant claims. A properly dependant claim shall not conceivably be infringed without infringing the claim from which it depends. The nucleic acid of claim 5, for example, can readily be infringed without infringing the protein of claim 1 from which it depends. Further, 35 U.S.C. § 112, fifth paragraph, states that a multiple dependant claim can not depend from another multiple dependant claim and must refer to the claims from which it depends in the alternative only. Claims 9, 10 and 14 of the instant application, for example, are improperly multiple dependant claims. Applicant may wish to amend the claims in response to this communication to avoid these issues in the next action.

Art Unit: 1646

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John D. Ulm whose telephone number is (703) 308-4008. The examiner can normally be reached on Monday through Friday from 9:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yvonne Eyler can be reached at (703) 308-6564.

Official papers filed by fax should be directed to (703) 308-4242 or (703) 872-9306. Official responses under 37 C.F.R. § 1.116 should be directed to (703) 872-9307.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.
